

KEY ACHIEVEMENTS

Delivered 40+ Zapier Automations

Designed and deployed **Zapier-based automation workflows** connecting CRM, SaaS, marketing, sales, finance, and operations tools for multiple business teams.

Engineered Reliable & Scalable Workflows

Built **fault-tolerant Zapier automations** with error handling, data synchronization, and task optimization, ensuring stable performance and long-term maintainability.

Built Automations Saving 1,000+ Hours Annually

Delivered 40+ Zapier automations across CRM and operations tools.

EDUCATION

Bachelor of Engineering – Computer Science

Warsaw University of Technology  
2014 - 2019

SKILLS

AI Development • Full-Stack Development •  
Web Development • Sass • Python • Next.js •  
PostgreSQL • Django • API Integration •  
Golang • Vue.js • Automation • n8n •  
Make.com • Airtable • GHL • Android

PROJECT

Real Estate Intelligence Web Platform

Created a Next.js + Node.js platform that aggregated property data, generated AI insights, and provided real-time recommendations. Supported thousands of daily users with **high scalability** and clean architecture.

SUMMARY

With 8+ years of experience, I specialize in building scalable web and mobile applications using React, Next.js, TypeScript, and modern development technologies. I thrive on turning complex problems into elegant solutions that users love.

Building intelligent systems with voice agents, AI chatbots, RAG systems, and workflow automation. Transforming complex problems into elegant AI-powered solutions.

EXPERIENCE

AI Automation Developer 01/2023 - Present  
MindSmash AI Warsaw, Poland

- I design and implement automation systems for logistics, marketing, and back-office operations using tools such as n8n, Make, Zapier, Airtable, and Google Sheets.
- Design and implement advanced automation systems using n8n to connect applications, streamline operations, and eliminate repetitive tasks.
- Create tailored AI-powered workflows and scripting solutions that enhance productivity, accuracy, and decision-making for businesses of all sizes.
- Focus on building reliable, scalable, and maintainable automations that help clients save time, reduce costs, and unlock the full potential of their digital processes.

Full-Stack Web & Mobile Developer 07/2019 - 12/2022  
Droids On Roids Wroclaw, Poland

- Delivered high-quality projects across diverse domains, including web and mobile applications, API development, and cloud integrations (AWS, GCP).
- Achieved Top-Rated status with a 91% job success score.
- Completed more than 10 projects focusing on scalable solutions.
- Consistently praised for skillfulness, quick learning, and strong communication.
- Earned repeated engagements through reliability and expertise.

Full Stack Developer 05/2015 - 10/2018  
CloudTech Solutions Warsaw, Poland

- Built a FastAPI-based backend for secure medical data handling.
- Used LoRa fine-tuning to improve medical terminology accuracy.
- Implemented vector search for quick retrieval of patient histories.
- Automated internal workflows using n8n and custom Python services.
- Improved documentation efficiency by 40% for clinic staff.
